INTRODUCTION

The following guidelines on employment have been provided as a framework for the application of fair and consistent employment practices within the Municipality.

These policies are necessary to enable employees to contribute towards the attainment of the Municipality's organisational strategic objectives.

The Human Resources Policy Manual has been compiled in an enabling spirit and sets out the policy relating to employment within the Municipality. It is therefore, important that these policies be perceived as an enabling tool, to facilitate employee management within the Municipality.

These conditions of service have also taken into consideration the following:

- ✓ The Municipality's strategic objectives;
- ✓ The expectations of the identified stakeholders

All conditions of service in this document subscribe to the laws of South Africa. The Municipality is an equal opportunity employer that values diversity in the workplace. It is an organisation that wishes to reflect the demographics of the country and promotes gender equality and sensitivity in the workplace.

In compiling this Human Resources Policy Manual reference was made to the Employment Equity Act No. 55 of 1998, the Labour Relations Act No. 66 of 1995, the Basic Conditions of Employment Act No. 75 of 1997, the Promotion of Equality and Prevention of Unfair Discrimination Act No. 4 of 2000, the Skills Development Act No. 97 of 1998, the Local Government Municipal Finance Management Act, 2003, the White Paper on Affirmative Action in the Public Service and the White Paper on Human Resource Management in the Public Service. Organisations that are "similar" to the Municipality were studied and some aspects of the Municipality's conditions of service were modelled against these organisations.

Conditions of service in the manual were also benchmarked against other leading organisations both locally and internationally. This document is a working and living document that will continue to be updated in response to the needs of the Municipality as a growing and changing organisation. It should be remembered that the development of Human Resources Policy Manual is an interactive process; hence, this document will continue to be reviewed from time to time, and be adjusted accordingly as the activities of the Municipality dictate.

3. DRESS CODE

Introduction

Abaqulusi Local Municipality, located within the Local government sector is aiming, at all times, to project and enhance its professional image, in keeping with its Mission. The dress of officials plays an important part in conveying and reinforcing this image to our clients and to the public in general as well as towards achieving world class standards.

General principles

The aim of this policy is to afford employees an opportunity to dress more comfortably for work. It is however important that all employees of the municipality share an appreciation for the professional nature of our business, the expectations of our clients, the environment in which we conduct business and the benefits we derive by making an appropriate dress code a part of our culture.

As always, the municipality expects everyone to present a professional appearance in dress and grooming. People should therefore use their discretion and good judgement in determining suitable clothing choices in order to present a professional appearance. It is important to note that an appropriate dress code is a merger between traditional business attire and the comfort of casual clothing and that at all times our clothing should reflect business first and casual second.

AbaQulusi Local Municipality understand that fashions in dress and grooming change from season to season. We appreciate and expect our employees to respond to these changes in fashion. However, in doing so we expect all our employees at all times to exercise good taste and to avoid any excesses that could detract from the overall professional image that we constantly seek to project.

Contravention of the dress code

We expect our people to continue to portray the quality, integrity and professionalism of the Municipality in their appearance and the benefit cannot be preserved if all staff do not follow the guidelines noted in this policy. If in doubt, consult your line manager or the HR section for advice and guidance.

If someone has crossed the line of 'acceptable' dress, they may be approached by their manager, with the suggestion that they reconsider their attire for the day. If the clothing is unacceptable and in clear violation

of the Municipality's guidelines, there will be the expectation that the person goes home to change into more suitable attire.

Dress Code limitations

All employees are permitted to use the guidelines as outlined below, subject to the following provisos:

1. Where employees are expected to conduct client work under difficult circumstances e.g. site inspections/ visits or stock counts on industrial premises, they will be allowed to dress appropriately for the work they are expected to perform and the circumstances under which they need to perform this work.
2. The appropriate dress codes will apply for external functions e.g. cocktail, black-tie.
3. Business casual attire, rather than casual attire to be worn when attending either internal or external courses.

Technical Services

Items which are suitable clothing for technical staff members are the protective clothing as issued by the municipality. Such clothing, however, should at all times be clean, neat and unwrinkled.

15. EMPLOYMENT EQUITY POLICY

Objectives:

To transform AbaQulusi Local Municipality into a non-racial, non-sexist institution, and to ensure that staff is so composed that it is able to serve effectively and fairly all members of the community with due regard to culture and ethnic diversity.

To address imbalances in the composition of the present and future internal labour force with regard to race and gender by means of an Affirmative Action Programme for a limited period, until such time as the staff composition of the AbaQulusi Local Municipality is representative of the relevant labour market at all organisational levels.

The purpose of the Affirmative Action Programme is to level the playing field thereby enabling previously disadvantaged people to compete on an equal footing with other candidates for appointments.

To eliminate all forms of discrimination in the employment situation whether based on race, creed, gender or any other form of stereotypes of persons or groups; as well as

To identify and abolish all barriers and subjective practices that hampers the employment and/or advancement of members of staff, especially those who have been historically disadvantaged by prejudices that favoured and disfavoured others.

Employment Policy

Any vacancy that arises due to a New Position being created, Death/Resignation or Dismissal of an Employee is advertised internally to grant employees from within the Council the opportunity to apply.

In terms of the Local Government Bargaining Council Salary structure all occupations are graded according to Responsibility, Qualification and Experience.

The Grading is divided into Post Levels 0-18. Post Level 18 being the highest & Post Level 0 the lowest.

NEW APPOINTMENTS

Special attempts are made to appoint applicants from disadvantaged groups to vacant positions while maintaining the merit principle.

Affirmative Action appointments will only apply in those job categories where disadvantaged people are not fairly represented.

Previously disadvantaged candidates will receive preference above others, all things being equal, in those job categories where Affirmative Action applies.

The merit principle will be adhered to. Merit is defined as the capacity to do the job, judged on qualifications, experience, knowledge, potential and/or demonstrated ability. Emphasis would be on meeting minimum requirements for the job and not necessarily appointing the ideal candidate or highest qualified candidate.

Relevant experience and length of service will be taken into account where formal qualifications are absent.

Disability and age shall not count as disqualifying criteria in recruitment or selection, unless if these are intrinsic requirements for specific positions.

Vacant positions must be analysed to determine the realistic person and post requirements (e.g. qualifications, experience and physical requirements) that meet the needs of the job and which do not privilege people with higher qualifications than those needed for the position.

Appointments and promotions will be based on prerequisite ability (proficiency and potential) so as to maintain and/or promote economic effectiveness, productivity and standards.

16. RECRUITMENT POLICY

1. Recruitment

Where a vacancy arises the respective Head of Department is required to write a request for vacancy to be filled that will be approved by the Municipal Manager.

1.2 INTRODUCTION

A Municipality's Performance Management System (PMS) is the primary mechanism to monitor, review, and improve the implementation of its IDP and to gauge the progress made in achieving the objectives set out in the Integrated Development Plan (IDP). In addition, a Municipality's PMS must also facilitate increased accountability, learning, improvement, provide early warning signals and facilitate decision-making.

The performance management system monitors actual performance against set targets and contractual obligations. Effective service delivery relies upon the IDP, efficient utilisation of all resources and the performance management system being closely integrated across all functions at an organisational and individual level.

This documents sets out:

- The legislative mandates that the PMS needs to comply with;
- The definition of a PMS, its objectives and the principles that will inform its use and continuous improvement;
- The process proposed for reviewing and implementing organizational performance management ; and
- The process proposed for reviewing and rolling out individual performance management

The organizational and individual performance management are linked. Once organizational objectives and targets have been set for the municipality, municipal departments and business units. In turn, the individuals, business units and departments, by achieving their objectives and targets, contribute towards the Municipality achieving the objectives of the IDP.

1.3 LEGISLATIVE MANDATES

1.3.1 The Constitution of the Republic of South Africa No. 108 of 1996

Chapter 10 Section 195(1) –Basic values and principles governing public administration.

- Good human resources management and career development Practices, to maximise human potential, must be cultivated
- Effective and efficient use of resources must be promoted and
- Public administration must be accountable

1.3.2 The White Paper on Local Government (1998)

The White Paper on Local Government (1998) suggests that local government should introduce the idea of *performance management systems*.

It states that a performance management system would provide early warnings where municipalities are experiencing difficulties, and enable other spheres of government to provide appropriate support before a crisis develops.

The white paper acknowledges that, "involving communities in developing some municipal key performance indicators increases the accountability of the municipality. Some communities may prioritise the amount of time it takes a municipality to answer a query, others will prioritise the cleanliness of an area or the provision of water to a certain number of households. Whatever the priorities, by involving communities in setting key performance indicators and reporting back to communities on performance, accountability is increased, and public trust in the local government system enhanced" (The White Paper on Local Government, 1998).

1.3.3 Municipal Systems Act (Act No 32 of 2000)

Chapter 6 of the Municipal Systems Act, and specifically Sections 38 to 49, deal with organisational performance management. These legislative mandates require of all municipalities to:

- Development of a performance management system;
- Monitoring and review of performance management system;
- Setting of key performance indicators and performance targets,
- Publish an annual report on performance for the benefit of the communities served by the Municipality;
- Incorporate and report on a set of general key performance indicators prescribed nationally by the Minister responsible for local government;
- Auditing of performance measurement both internally and externally;
- Annual reporting on performance.

Chapter 7 of the Municipal Systems Act deals with local public administration and human resources. In particular, section 57 of this Chapter requires that the Municipal Manager and those officials reporting directly to the Municipal Manager (i.e. Section 56 employees) sign annual performance agreements. An individual performance plan must be attached to the performance agreement and it must include a set of performance measures that will enable actual performance of individuals to be assessed against planned performance.

1.3.4 Local Government: Municipal Planning and Performance Management Regulations, 2001

These Regulations were passed by the Minister responsible for local government in terms of Section 49 of the Municipal Systems Act. These Regulations spell out the performance management responsibilities of municipalities in more detail. They deal with:

- The nature of the PMS;

- The adoption of the PMS;
- The setting of key performance indicators;
- The general key performance indicators published by the Minister, which reflect the object of developmental local government;
- The review of key performance indicators;
- Setting of performance targets;
- Monitoring, measurement and review of performance; □ internal auditing of performance measurements; and □ Community participation.

The regulations further instruct a municipality to ensure that its performance management system:

- Complies with the requirements of the Act;
- Demonstrates how the system will operate and be managed from the planning stage up to the stages of performance and reporting;
- Clarifies the roles and responsibilities of each role player, including the local community, in the functioning of the system;
- Determines the frequency of reporting and the lines of accountability for performance;
- Relates to the municipality's employee performance management processes;
- Provides for the procedure by which the system is linked to the municipality's Integrated Development Planning processes;
- A performance management system must be adopted before or at the same time as the commencement by the municipality of the process of setting key performance indicators and targets in accordance with its integrated development plan.

The implementation of the performance management framework should allow the municipality to collect, process, organize, analyse, audit, reflect and report on performance information. It should also allow the municipality to take practical steps to improve its performance

1.3.5 Local Government: Municipal Performance Management Regulations, 2006

The Local Government Municipal Performance Regulations for municipal managers and managers directly accountable to municipal managers (Government Gazette No.29089, 1 August 2006), sets out how the performance of Section 56 staff will be uniformly directed, monitored and improved. The regulations address both the employment contract and performance agreement of municipal managers and managers directly accountable to municipal managers. It further provides a methodology for the performance management system as well as criteria for performance bonus payments. The regulations also provide an approach for addressing under-performance, should this occur. The regulations will be discussed in greater detail in a later section of this framework document.

1.4 DEFINITION AND OBJECTIVES OF PERFORMANCE MANAGEMENT (PMS)

1.4.1 DEFINITION OF PMS

Performance management is defined as: “a strategic approach to management, which equips leaders, managers, employees and stakeholders at different levels with a set of tools and techniques to regularly plan, continuously monitor, periodically measure and review performance of the organisation in terms of indicators and targets of efficiency, effectiveness and impact.”

1.4.2 OBJECTIVE OF PERFORMANCE MANAGEMENT

The objectives of performance management are, inter alia to:

1.4.2.1 Facilitate increased accountability

The PMS should provide a mechanism for ensuring increased accountability between:

- The citizens of the Local Municipality and the Municipal Council;
- The political and administrative components of the Municipality; and
- The Office of the Municipal Manager and each municipal department.

1.4.2.2 Facilitate learning and improvement

The PMS must also provide a platform for learning and improvement. It should enable the Municipality to assess which approaches and methods are having the desired impact and in this way enable the Municipality to make the necessary improvements that will lead to more effective service delivery. It should form the basis for monitoring implementation, evaluating and improving the IDP.

1.4.2.3 Provide early warning signals

The PMS should provide managers and supervisors at all levels, the Municipal Manager, Portfolio Committees and the Council with early warning of performance targets that are not going to be reached and thus adversely affecting the implementation of the IDP. It is important that the system informs decision makers of areas of delivery that are lagging behind so that they can intervene and take corrective action as required.

1.4.2.4 Facilitate decision making

The PMS should provide suitable management information that will allow for efficient, effective and informed decision making, particularly on the allocation of resources.

The objectives listed above are not exhaustive, but briefly summarize the intended benefits of the PMS that is to be reviewed and implemented. These intended objectives, together with other criteria, should be used to evaluate the PMS at the end of each financial year.

1.5 PRINCIPLES OF PERFORMANCE MANAGEMENT

The following principles are proposed to inform and guide the review and implementation of the Abaqulusi Local Municipality's PMS:

1.5.1 Simplicity

The system must be a simple user friendly system that enables the Municipality to operate it with its existing resources with the involvement of external stakeholders.

1.5.2 Politically driven

The legislation requires the PMS to promote a culture of performance management in the political structures. It further states that Council must manage the development of the PMS and assign responsibility in this regard to the Municipal Manager. Once developed, Council must adopt the PMS. This means that Council is the owner of the system and must therefore oversee the implementation and improvement of the system and in the process inculcate a culture of performance improvement as is required by the Municipal Systems Act.

1.5.3 Incremental implementation

One of the most important lessons learnt by municipalities that have developed and implemented successful PMSs is that it is an incremental process. They point out that the most important thing to do is to start measuring and reporting performance and not to carry on developing the "best" system – start with a basic system, implement it and then improve it incrementally. It is not possible to transform overnight from close to noncompliance to international best practice. In practice it is only possible to move gradually towards a high performance organisation.

1.5.4 Transparency and accountability

The process of managing performance should be inclusive, open and transparent. Citizens should know how departments within the municipality are run, how resources are spent, and who is in charge of particular services. Similarly all information on the performance of departments should be available for other managers, employees, the public and interest groups.

1.5.4 Integration

The PMS should be integrated into other management processes in the municipality, such that it becomes a tool for more efficient and effective management rather than an additional reporting burden. It should be seen as a central tool for managing the affairs of the Municipality.

1.5.5 Objectivity

Performance management must be founded on objectivity and credibility. Both the process of managing performance and the information on which it relies need to be objective and credible

2. PART TWO: ORGANISATIONAL PERFORMANCE MANAGEMENT

2.1 INTRODUCTION

At this level the performance of the municipality is measured and managed against the progress made in achieving the strategic objectives as set out in Integrated Development Plan (IDP). This is done on the basis of the Key Performance Indicators set for each of the IDP objectives.

The measures set at this level should be strategic and mostly long-term with an outcome and impact focus. The IDP has a five-year time span and the measures set at this level must be captured in an organisational scorecard.

2.2 PLANNING

Performance planning commences with the development or review of the Integrated Development Plan, at the beginning of the term of council or as part of the annual review of the IDP. The IDP in fact constitutes an important part of the PMS and it is important to integrate the work done during the review of the IDP into the PMS and to ensure that the PMS is an extension of the IDP – it is the tool that is used for monitoring the implementation of the IDP.

The municipal council will, as prescribed in its IDP process plan, adopt:

- The PMS framework;
- The municipal strategic balanced scorecard which outlines IDP priorities and objectives;
- Service Delivery and Budget Implementation Plans (SDBIPs) which outlines municipal initiatives, programmes, projects, services, key performance indicators, performance targets and budget summaries.

The municipality must involve the community in the development of the performance management system, setting of KPIs and performance targets in accordance with section 9 and 15 of the Local Government: Municipal Planning and Performance Management Regulations, 2001.

2.3 IMPLEMENTATION

The actual implementation and operation of the PMS occurs simultaneously with the implementation of the IDP. The implementation of the IDP over a single financial year is given effect through the Service Delivery Budget Implementation Plan (SDBIP), scorecards, performance contracts of the Municipal Manager and other S56 Managers. The Service Delivery Budget Implementation Plan (SDBIP) is the implementation tool used to align the budget to the IDP. The focus of the SDBIP is both financial and non-financial measurable performance objectives in the form of service delivery targets and other performance indicators.

The SDBIP is essentially the management and implementation tool which sets in-year information, such as quarterly service delivery and monthly budget targets, and links each service delivery output to the budget of the

Municipality, thus providing credible management information and a detailed plan for how the Municipality will provide such services and the inputs and financial resources to be used.

The key performance areas and indicators of performance contained in the organizational scorecard are cascaded into departmental scorecards, and further into individual scorecards which ensure the appropriate alignment between organizational and individual performance.

2.4 MEASUREMENT

Measurement occurs when value is ascribed to costs, resources and time used to produce output using input indicators. It indicates the extent to which municipalities' activities and processes produced outputs in accordance with the identified output indicators. It measures the total improvement brought about by outputs in accordance with outcome indicators.

2.5 MONITORING

Monitoring is a continuous process of measuring, assessing, analysing and evaluating the performance of the organization and departments with regard to KPIs and targets. The municipality must develop mechanisms, systems and processes for monitoring performance.

The monitoring framework must:

- Identify the roles of the different role players in monitoring and measuring the Municipality's performance;
- Provide for reporting to the municipal Council at least twice a year;
- Be designed in a manner that enables the Municipality to detect early indications of under-performance;
- Provide for corrective measures where under-performance has been identified; and

2.6 REVIEW

Review includes assessment of the system itself, the framework, targets, and performance targets of departments and performance measurement of employees. It identifies the strengths, weaknesses, opportunities and threats of the municipality in meeting key performance indicators, performance targets and general key performance indicators. It also measures the economy, efficiency, effectiveness in the utilization of resources and impact in so far as performance indicators and targets set by the municipality are concerned. Performance improvement and adjustment is based on review. The municipality should ensure that the community participates in the review process.

2.7 PERFORMANCE AUDITING

The Municipal Planning and Performance Management Regulations, 2001, requires municipalities to develop and implement mechanisms, systems and processes for auditing the results of the performance measurements as part of its internal auditing processes. This is meant to ensure that performance information collected by the municipality is verifiable, reliable and correct.

2.7.1 INTERNAL AUDITING

The Regulations provides that the internal audit activity must include assessments of the following:-

- The functionality of the municipality's performance management system;
- Whether the performance management system complies with the relevant provisions of the Municipal Systems Act, 2000;
- The extent to which the municipality's performance measurements are reliable in measuring performance.
- On a continuous basis, audit the performance measurements of the municipality;
- Submit quarterly reports on their audits to the Municipal Manager and the Performance Audit Committee.

2.7.2 EXTERNAL AUDITING

The results of performance measurements must be audited annually by Auditor-General.

2.7.3 PERFORMANCE AUDIT COMMITTEE

2.7.3.1 The Regulations further provides for the creation of a Performance Audit Committee:

- The municipality must annually appoint and budget for a Performance Audit Committee of at least three members, the majority of which cannot be a councillor or an official of the municipality;
- Any external member of the committee may be remunerated in line with tariffs determined by the South African Institute of Chartered Accountants;
- A municipality must provide secretariat services for its audit committee;
- The Performance Audit Committee must meet at least twice during the financial year, but a special meeting may be called by any member of the committee.

2.7.3.2 The roles and responsibilities of the Performance Audit Committee are the following:

- Review the quarterly reports submitted to it by the Internal Audit Activity;
- Review the municipality's performance management system and make recommendations in this regard to the council of that municipality;
- In its review of the system, focus on economy, efficiency, effectiveness and impact of the KPIs and targets set; and
- Submit an audit report to the municipal council twice during a financial year.

2.7.3.3 In order to fulfil their functions, a Performance Audit Committee may:-

- Communicate directly with the Council, Municipal Manager or the Internal Auditors of the municipality;
- Access any municipal records containing information that is needed to perform its duties or exercise its powers;
- Request any relevant person to attend any of its meetings, and if necessary to provide information needed by the committee; and
- Investigate any matters it deems necessary for the performance of its duties and the exercise of its powers.

2.7.3.4 The composition of the Performance Audit Committee should ensure that the following competencies are sufficiently catered for within the group:

- Expertise in performance management;
- Expertise in finance;
- An understanding of development planning; and
- Credibility within all communities and organs of civil society within the municipality.

3. PART THREE: INDIVIDUAL PERFORMANCE MANGEMENT

3.1 INTRODUCTION

At this level, the performance of individuals is measured against personal performance targets, set in accordance with their job descriptions. These targets are also linked to the IDP and relevant department's SDBIP, in this way ensuring that performance management at the various levels is linked and integrated.

3.2 SECTION 54A AND 56 EMPLOYEES

3.2.1 The performance agreements of the Municipal Manager and those managers reporting directly to the Municipal Manager, is the cornerstone of individual performance management.

3.2.2 In terms of Section 57 of the Municipal Systems Act these employees are required to sign a performance agreement within a reasonable time after assuming duty and then within one month after commencement of the new financial year.

3.2.3 The performance agreement should be informed by the departmental and municipal scorecards and the content of the performance agreement should include the following:

- The legal agreement to be signed by the employer and the employee, a template of which is attached at Annexure A.
- A performance plan containing key objectives, key performance indicators, performance targets (outputs) and the weighting of each output.
- A personal development plan that identifies the competencies and other development needs of the employee, as well as interventions to improve these. Refer to the suggested template at Annexure B.

3.2.4 The criteria upon which the performance of the employee must be assessed consist of two components, both of which must be contained in the performance agreement. The employee must be assessed against both components, with a weighting of 80: 20 allocated to the Key Performance Areas (KPAs) and the Core Competency Requirements (CCRs), respectively. Each area of assessment will be weighted and will contribute a specific part to the total score. KPAs covering the main areas of work will account for 80 % and CCRs will account for 20 % of the final assessment.

3.2.5 The employee's assessment will be based on his or her performance in terms of the outputs/outcomes (performance indicators) identified as per the performance plan which are linked to the KPA's, which constitute 80 % of the overall assessment result as per the weightings agreed to between the employer and employee.

3.3 PERFORMANCE REVIEWS

3.3.1 The performance of the employee in relation to his or her performance agreement must be reviewed quarterly, with the understanding that reviews in the first and third quarter may be verbal if performance is satisfactory.

3.3.2 The employer must keep a record of the mid-year review and annual assessment meetings.

3.3.3 Performance feedback must be based on the employer's assessment of the employee's performance.

3.3.4 The employer will be entitled to review and make reasonable changes to the provisions of the performance plan from time to time for operational reasons on agreement between both parties.

3.3.5 The employer may amend the provisions of the performance plan whenever the performance management system is adopted, implemented and/or amended as the case may be on agreement between both parties.

3.4 MANAGEMENT OF EVALUATION OUTCOMES

3.4.1 Evaluation of the employee's performance will form the basis for rewarding outstanding performance or correcting unacceptable performance.

3.4.2 A performance bonus ranging from 5% to 14% of the all-inclusive remuneration package may be paid to an employee in recognition of outstanding performance. In determining the performance bonus the relevant percentage is based on the overall rating, calculated by using the applicable assessment-rating calculator; provided that:-

- a score of 130% to 149% is awarded a performance bonus ranging from 5 % to 9%;and
- a score of 150% and above is awarded a performance bonus ranging from 10% to 14%.

3.4.3 In the case of unacceptable performance, the employer shall:-

- provide systematic remedial or developmental support to assist the employee to improve his or her performance; and
- After appropriate performance counselling and having provided the necessary guidance and/or support and reasonable time for improvement in performance, and performance does not improve, the employer may consider steps to terminate the contract of employment of the employee on grounds of unfitness or incapacity to carry out his or her duties.

4. PART FOUR: PERFORMANCE MANAGEMENT STANDARD OPERATING PROCEDURE

4.1 INTRODUCTION

By definition, Standard Operating Procedures (SOP's) within the context of Performance Information and Portfolio of Evidence, is a written description of steps for all significant activities relating to the practice of Management of Information. SOP's should accurately reflect good information management practices, be sufficiently practical and be usable in the municipal environment. Good management practices relate to general aspects of performance management functions including data collection, compilation, analysis, storage, data processing, record storage, handling of urgent data requests/needs, management of the devices, tools, appliances used to manage data.

4.2 BENEFITS OF STANDARD OPERATING PROCEDURES

There are several benefits in having generic SOP's; these include among others the following:

- Harmonisation of performance management reporting procedures to ensure effective and efficient coordination in the development of Portfolio Of Evidence (POE's);

- Validity and credibility of reported actual on reporting templates is enhanced by signing off by the respective incumbent preparing the reported information, including the Manager (head of section) and the Director (head of department);
- Ensures better alignment between reported actual and source document (POE);
- Improve attainment of organisational targets;
- Improve outcomes of audit processes as a standardized POE will be implemented for all user departments;
- Improve better alignment with legislation governing organisational performance, i.e. MFMA, MSA and Performance management regulations, and;
- Effective accountability will be displayed during performance assessments as incumbents and supervisors will both be reliant on the POE during their respective performance assessments.

4.3 DOCUMENTING A PERFORMANCE MANAGEMENT SYSTEM IN ABAQULUSI MUNICIPALITY

Process	Activity	Responsibility	Time-frame
1. Compilation	All Departments are to complete their quarterly reports in terms of the SDBIP in a standard prescribed format.	Strategic Executive Directors and Managers	Within 5 days after the quarter has ended

34. SUCCESSION PLANNING AND CAREER PATHING POLICY

1. Definition

1.1 "Succession planning" means making the necessary arrangements to ensure that suitably qualified people are available to fill posts which will arise within any specific department over forthcoming years.

1.2 "Career pathing" means ensuring that each staff member's potential is developed to its fullest extent and that there is a career mapped out for him/her in the municipal service. The aim should be an attempt to train and develop the employee to the extent that he/she is able to reach the level of seniority to which he aspires and to be able to competently undertake the duties attached to that post.

2. Purpose of the Succession Planning and Career Pathing Policy

- To ensure continuity of suitably trained staff in key posts for the future to ensure that someone is always available to fulfil any particular job in the municipal service, even in the event of illness, resignation or death. More than one staff member in a specific department should always be able to do any particular job.
- to comply with the legal requirements of the Employment Equity Act which requires the appointment and promotion of suitably qualified persons from previously disadvantaged groups, to ensure proportional representation in all occupational categories and levels.
- To ensure that training programs are undertaken in an orderly way and that staff do not simply attend training courses without a purpose. In this way training initiatives can be properly focused.
- To develop career paths for individual staff members to assist them in their careers, making them more enthusiastic about their jobs and therefore making them more productive. In this way, the individual skills may be utilized to achieve the goals of both the department as well as the organization.
- To assist the employee in meeting his/her performance goals. Individual goals must be aligned with the goals of the overall department and the organisation, including the Council's Integrated Development Plan (IDP) and budget. Succession planning and career planning must, furthermore, be aligned with all other human resources activities such as selection, training, performance management etc.
- To establish a highly motivated work force which could lead to a decrease in staff turnover

3. Responsibility in Implementing Succession Planning and Career Pathing

The responsibility for implementing succession planning and career pathing rests with management (more specifically departmental management), the Corporate Services Department and the employees themselves. The trade unions should also play a supportive role in the process.

The responsibility for succession planning and career pathing should be seen as a partnership between these parties.

More specifically, the responsibilities of the partners in the succession planning and career pathing process are as follows:

3.1 Responsibilities of the Council (Management)

- the council must accept the responsibility for the training and development of all its employees
- the council must, further, participate in skills training and development on all levels in the organization and commit itself to the implementation and continuous participation in the Succession Planning and Career Pathing program
- The Council (or employer) also has a responsibility to make resources (financial and other) available in order to promote the implementation of succession planning and career pathing. Provision must be made in the training budget of the municipality for this funding.
- the council must establish and maintain structures, policies and procedures (job enrichment, job rotation, job enlargement, special projects, career counselling, discussion groups, workshops, assessment centres) to facilitate Succession Planning and Career Pathing within the organization.
- The council must support the development of each employee by availing/creating the necessary resources viz. facilities, training personnel, transport, course materials and stationery as well as paid time-off for training
- The council should, at its discretion, allow employees to repeat the training and development programs or part thereof, where the employee has not developed the required competency
- The council may decide, based upon fair criteria, which employees are suitable for specific training and development.

3.2 Responsibilities of the Unions

- The unions should continuously encourage and motivate their members to participate in training and development programs
- The unions should play a supportive role in the implementation of Succession Planning and Career Pathing, in particular in assisting with implementation of employment equity.

3.3 Responsibilities of Employees

- Employees should commit themselves to participation in training programs so that the process of training and development can succeed and be carried to its full extent.
- It is necessary that employees make use of these programs in an enthusiastic manner by voluntary participation, continuous attendance, acceptance of responsibility for personal development, providing continuous positive input etc.
- Employees must accept the principle that age is of no importance in training and development.

4. What is needed to prepare Succession Planning and Career Pathing Documents

The Strategic Executive Director of Corporate Services, together with the Human Resources official (preferably Manager HRD) should obtain the following:

- Departmental organogram
- Skills audit results
- Performance appraisal forms for all of the staff within the department. Obtaining these forms necessitates the implementation of a Performance Management System (PMS) within the municipality. Municipalities are legally required, in terms of the Municipal Systems Act, to have a performance management system in place for senior staff members. It is recommended that this system be applied to all staff members within the municipality and the Performance Appraisal Forms resulting from the implementation of the PMS are necessary to undertake succession planning.
- Departmental estimates or staff budget
- schedule showing the ages of current staff and dates of retirement. This can be obtained from the Human Resources Department
- Job descriptions for all the posts in the department together with competency-based job outcomes for each post. These job outcomes must comply with the format of the unit standards as prescribed by the National Qualifications Framework (NQF).

5. Procedure for compiling a Succession Planning Document

Once all of the information mentioned above has been obtained, it will then be possible to compile a succession planning document. The following steps must then be followed:

1.1 STEP 1

Each year, the Head of Department, together with the Human Resources official responsible for training and development, must examine the organogram of the department to establish:

- Which posts are likely to become vacant over the next five years owing to retirements (from the schedule of ages of employees mentioned above). Provision should also be made for cases of possible termination due to the resignations, deaths, dismissals etc.
- which posts on the organogram are already vacant and have funds provided for them on the annual estimates.
- which previously disadvantaged individuals and other employees within both the department and the municipality as a whole can possibly be groomed or developed for more senior posts (this information can be obtained from the skills audit)
- Which posts require specialist technical or formal training, e.g. university degrees and for which there are presently no suitably qualified internal staff members

1.2 STEP 2

The Head of Department, together with the human resources official should then prepare a draft organogram of how the departmental structure should look over the next one to five years. This draft organogram should reflect new posts that will be needed and any possible improvements to the current staff organogram.

(NOTE: Departmental heads must bear in mind that there are limited funds available for new staff members and a realistic assessment of future staff needs must be made.)

1.3 STEP 3

The Head of Department should then begin to “pencil in” the names of possible employees within the department who could be groomed for promotions for new posts or for posts becoming vacant as a result of retirements etc. Previously disadvantaged employees must be given preference where necessary to comply with the provisions of the **MUNICIPALITY** Employment Equity plan.

Information on which employees can be earmarked for possible promotion can be obtained from the Skills Audit results and the Performance Appraisal forms.

1.4 Step 4

A competency development plan, to improve the competency of identified employees must then be implemented.

Where there are specialist posts which are expected to arise and which require formal qualifications, employees who have shown the necessary potential and interest should be offered bursaries (subject to finance being available), or alternatively generally be encouraged to register at a Technicon or University on a part-time or correspondence basis. All possible assistance and encouragement must be provided to the employees.

Step 5

Where additional informal training is necessary, suitable training courses must be identified and arrangements made for the identified employees to attend. This should be done in consultation with the employee concerned who should be informed that should he/she show promise, he/she will stand a better chance of promotion. However, no promises must be made.

It is important that the training courses which the employees are given cover all competencies and that, at the end of the course, the employee must be able to deliver the performance outcomes required for the job.

Step 6

Where on-the-job (or in-service) training is necessary, arrangements should be made to allow the identified employee to act in the higher post when the present incumbent is on leave, in order to confirm his suitability. In this way, the Head of Department will be able to establish whether the employee has the ability to meet the performance standards set for the post.

Step 7

If no suitable in-service training within the municipality exists, some local authorities can be approached to assist in this matter.

Arrangements can be made to send the identified employees to other municipalities for limited periods, in order to obtain in-service training and experience by working with persons who are undertaking those duties. Some municipalities are prepared to assist in this matter, provided there is no cost implication for them.

Step 8

Identified employees can also be allowed to work directly under a qualified employee within the municipality, who would be his/her mentor. This would enable him to acquire skills at limited cost.

6. Purpose of the Competency Development Plan

The purpose of the Competency Development Plan mentioned under Steps 4 – 8 above is to improve the competency of the employees in order that future staff needs are met. It is important that after undergoing the competency development process, staff members are able to fully comply with the unit standards. This means, for example, that they must be able to do all of the tasks set out in the example column of Annexure A.

7. Procedure for compiling a Career Pathing Document

Where staff members have been shown to be competent in their jobs (as identified from the Performance Appraisal forms) and where they display the necessary potential and aspirations, special career path documents should be drafted for these employees. Other staff should also not be overlooked and career paths for them should also be determined, bearing in mind any limited aspirations or interest in promotion.

The following steps should be taken in preparing a career pathing document:

Step 1

Once per year, the Head of Department (preferably with the human resources official) should hold a meeting with each member of staff in order to ascertain how great the employee's aspirations or ambitions are. The employee's past performance (as identified from the Performance Appraisal form) should also be discussed, as well as any possible improvements that are needed and any additional training which is required.

Step 2

It is important that the Head of Department be flexible in his/her view of the potential of the employees. The human resources representative can assist in maintaining objectivity in these cases. The employee's aspirations must then be compared with his/her current performance and any improvements needed must be set out.

Step 3

If the employee is at a fairly junior level, and wishes to progress to higher levels, he/she must be given every opportunity possible to develop the necessary skills. A possible career path document (an example is attached as Annexure B) should be shown to him/her and he/she should be informed that his progress will depend entirely on his/her ability, enthusiasm, dedication and hard work in his/her job.

Step 4

The document set out in Annexure A (as amended to suit the employee's particular career field) should be personalised with the employee's name on the top. Meetings with the Head of Department and the human resources representative should be held every year to discuss his/her progress and training and development needs.

STEP 5

Once the employee can prove by means of competency evaluation that he/she possesses the necessary skills and competence to perform the key tasks, he/she may then move to the next higher level of competency on his/her career path.

In this way a career pathing document for each individual employee can be compiled.

8. Conclusion

The correct implementation of Succession Planning and Career Pathing within a municipality will have great benefits for Municipality and staff members. Municipality will always have suitably trained staff available and employees will feel that their employer is concerned about their careers and keen to train and develop them.

36. RETENTION STRATEGY POLICY.

1. PREAMBLE

Staff recruitment and retention is currently regarded as one of the top priorities for strategic planning in an organization. This is focused on attracting employees to join the organization through focused recruitment and selection strategies and retaining those who are already employed especially those with crucial skills to the organization. The strategy will cover both the psychological aspects of employees, the operational aspects attached to the job or tasks where an employee is appointed and of utmost importance is about motivating staff.

The strategy will address intentions to retain staff, classification of skills and the key aspects of staff recruitment and retention. The strategy will further highlight on what will make employees to stay in the municipality and what interventions measures to put in place to minimize staff turnover.

2. DEFINITION

- d. To attract and retain competent staff.
- e. To retain key staff members whose services are regarded as critical or classified as scarce skills.
- f. To ensure career development for staff.
- g. To reduce annual staff turnover rate.

4. LEGISLATIVE FRAMEWORK

- a. Constitution of the Republic of South Africa
- b. Basic conditions of employment Act
- c. Employment Equity Act 55 of 1998

- d. Skills Development Act 97 of 1998

5. PRINCIPLES THAT UNDERPINS THE RECRUITMENT AND RETENTION STRATEGY

- f. The Recruitment and Retention policy should by no means be construed to be creating expectations for either promotion or monetary rewards.

6. BROAD RETENTION CHALLENGES NATIONALLY

- a. Employees leave their employers for a variety of reasons. Some of the reasons for staff turnover are unavoidable and beyond the employer's control, while others are avoidable and can be managed. It is on this basis that staff retention management is inevitable in this instance.

6.1. Unavoidable reasons

There is virtually nothing the employer can do with regard to unavoidable staff turnover, for instance caused by amongst others death, retirement, employee's health or family relocation or any unforeseen natural attrition.

6.2. Avoidable reasons

6.2.1. Financial considerations

Majority of employees leave the municipality because they are offered better salaries or service benefits elsewhere. Although the municipality's remuneration system is not competitive enough to attract and retain talented staff, the municipality can make efforts to reward staff who excel and to counter offer any attempt of staff poaching by other employers. The provision that allows the municipality to raise an employee's salary for purposes of retention is an important tool in this regard.

6.2.2. Work environment

Unpleasant, poor and constrained work environment leads employees to unhappiness at work and consider taking other job options attractive to them. Poor work environment may be caused by amongst other things low morale, little motivation of employees, lack of strategic direction, lack of leadership and communication and poor work challenges; and lack of empowerment of employees.

6.2.3. Career development

Employees want to grow in their work and will continually search for growth, and as such if the employer does not provide these opportunities, employees will begin to look for greener pastures elsewhere.

6.2.4. Leadership and management style

In most cases talented employees leave an organization if they believe that the management style is stifling growth and not empowering, or where managers are not people focused.

6.2.5. Lack of effective communication and procedure

It is a common for employees to find something that they dislike about their work environment or their managers and where there are no effective grievance procedures in place or not followed, employees will not have a way of having their concerns heard and addressed. In the end, the only option left is to tender a resignation.

7. Intentions to retain staff

Intentions to retain staff are most effective if they are aimed at a specific circumstance or skills group and the interventions are integrated and linked with a wide variety of human resource practices as possible.

The following human resources practices and policies need to be integrated and aligned with the retention strategy:

7.1 Recruitment and selection process

In most cases the increase in staff turnover is caused by bad selection decisions, wherein a wrong person is appointed for the job. In order to prevent this, effective and efficient recruitment and selection processes must be adhered to.

Accurate job requirements, job profile and job descriptions must be developed and they must clearly specify the core competencies required for successful performance. For this purpose the municipality has a Staff provisioning policy in place to guide the selection and recruitment process.

7.2. Effective induction methods

Best practice studies revealed that the first few weeks of employment are very much crucial for establishing employee commitment to employment. It is therefore, imperative that line managers and human resource practitioners lay the foundation for future commitment by being part of the induction process. In addressing this, new employees will receive a well-structured and dynamic induction programme that stretches from the employee's first day at work until he/she is thoroughly introduced to their job. For effective execution of the induction and orientation process to new recruits the municipality has an induction manual in place which should be reviewed annually in order to improve on its effectiveness and relevancy.

7.3. Exit interviews/ interviewing employees who turn down job offers Exit interviews are also an important tool that cannot be overlooked when designing staff retention interventions and these interviews will be conducted whenever an employee is leaving the municipality or when turning down the employment offer.

7.4. Counter offering

Counter offering is a measure that can be used in order to find and keep employees with scarce skills. Counter offering should always be done in consultation with the Municipal Manager. Jobs in the scarce skills and high risk categories should be properly designed and evaluated to maximize the compensation you can offer to candidates and employees.

The municipality must fully and correctly provide for the scarce skills allowances for certain categories of staff.

- Counter offering will be done on scarce skills, valued skills and high risk skills on the basis that reasons that drove the employee to look for employment somewhere else are addressed and eliminated.
- Line managers should consult Human Resources for intervention once they identify employees in the scarce skills categories showing interests to leave the municipality.
- As a standard procedure all employees to be counter offered, their files will be used to examine the quality of their work as reflected in the Performance Management System file and any other documented evidence supporting the counter offer.
- A committee of at least three members, consisting of Human Resources, Budget and Treasury, the Accounting Officer and the Head of the affected Department will be formulated to handle the counter offering process. When counter offering, an employee will be offered the same

salary level as that of the competing employer, however the notch will be higher than that of the prospective employer on the legs depending on the negotiations.

- The Human Resources will write an item to the Municipal Manager on the position to be counter offered with recommendations for approval by Accounting Officer.
- Counter offered employee will not be counter offered again should he/she receive a new job offer within twelve (12) months after being counter offered.
- In the event where a newly employee is appointed and starts the process of salary negotiations; the below information needs to be considered
 - Previous salary from the previous employer (payslip to be attached).
 - Salary Task levels as a guide (SALGA Task Levels)
 - Nature of the position and its requirements.
 - Interview Assessment results.
- The above information will be used to match the employee's previous salary.
- Human Resources will write a memo to the Accounting Officer requesting for salary adjustment of the newly appointed employee based his/her previous salary, scarcity of skills and the interview assessment report.
- Salary adjustment shall only be made based on the advertised scale, after considering the above requested information.

8. CLASSIFICATION OF SKILLS

a. Scarce Skills

These are skills that are needed to achieve the municipality's goals and objectives, but which are difficult to recruit and too expensive to replace.

These skills are:

- **Engineering skills**
- **Financial skills**
- **Town and Regional planning skills**

b. Valued Skills

The focus is on the valued staff member who contributes positively to the municipality and whose loss would have a negative impact on the municipality's ability to achieve its goals.

This will be determined by the employer by comparing the loss versus the value of the employee and the impact to the organization. The scarcity of the skill does not have a bearing on this category.

c. High risk Skills

These refer to employees with skills who may soon leave. These will include employees who have indicated a need to leave the municipality due to demotivation or reached a career ceiling (no career path).

9. KEY ASPECTS OF STAFF RECRUITMENT AND RETENTION

9.1. Compensation and benefits

The municipality strives to become the employer of choice and as such compensate its employees on a salary scale system which has several notches in each salary level in order to allow for salary progression of employees on an annual basis.

Salary negotiation will be allowed subject for availability of budget and subject to the identified criteria. It shall be led by Human Resources Manager in the staff under Section 55 of the Municipal Systems Act. The submission on the salary negotiation shall be approved by the Accounting Officer.

For all Senior Management positions (**the Municipal Manager and Section and Section 56 Managers**), the candidate negotiates for his/her remuneration package with the Accounting Officer on behalf of council or the Mayor if it is for the Accounting Officer.

In its endeavors to become the employer of choice, the municipality provide the following benefits and allowances to its employees:

- Pension Fund subsidy to all employees with the exclusion of Section 54/56 Managers
- Medical aid subsidy to all employees with a medical aid scheme.
- Housing subsidy to all employees with bonds and R350.00 per month for renting employees.
- Leave entitlement, 24 days – vacation, 80 days – sick leave per 3 year cycle, 5 days – family responsibility per annum and study leave days which varies as per the type of study.
- **Travelling allowance** to deserving employees and other designated employees as per the specific duties they are performing.
- **Cell phone allowances** to secretaries of the Office bearers, Municipal Manager, Executive Directors and other designated employees as per the specific duties they are performing.
- Provision of resources – The municipality will provide enough working tools to meet the demands of the job to all employees as guided by the specific jobs executing.

9.2. Training and development

The municipality has a training and development policy in place which will be utilized to guide the training and development of employees. Internal employee skills audit should be conducted annually in order to identify the skills gap, which will inform the development of the annual Workplace skills Plan. As encapsulated in the training and development policy, the types of training courses and development will be determined by the municipality as informed by the identified gaps of employees through skills audit.

The training and development policy further encourages all employees to be involved in their personal development and manage their own careers by indicating their training needs to their supervisors.

9.3. Internal staff bursary

The municipality must have an internal bursary scheme which intends to assist in securing adequately qualified personnel for its services by providing financial assistance to all employees to enable them to qualify educationally for the services they are rendering and to enhance the level of competency in performing duties assigned to them. The internal bursary aims at achieving the following:

- To encourage career development of employees through further education.
- To encourage self-development activities provided that they are along the lines regarded as beneficial by management.
- To provide financial assistance to employees who wish to improve themselves through formal courses of study.
- An employee will be given a registration fee for each year until she/he finishes his or her qualification.
- An employee that has been given bursary must serve the Municipality 24 months before he can be allowed to resign, failing which the money will be recovered from him.

9.4. Health, wellness and safety

The municipality complies with the Occupational Health and Safety Act (Act 85 of 1993) as it appointed a health and safety officer to deal with all aspects of health and safety in the workplace. While the Act places responsibility upon the employer to provide safe working conditions, it further obliges the employee to act responsibly. In furtherance of its responsibility, the employer will provide first aid trainings to employees and also provide safety talks to its employees. Personal protective clothing will also be provided to all employees as informed by their specific duties in terms of the health and protective clothing policy. The Abaqulusi Local municipality has an Employee Assistance Programmes which serve as strategic and

professional services to assist employees to enhance their quality of life and to help them with a view of improving their performance and productivity.

The Employee Assistance Programmes aims at achieving:

- To provide professional assistance with a view to enhance the personal well-being and quality of life of the employees and their immediate family members.
- To provide channels for correct and effective referral for assessment and treatment so as to ensure maximum assistance.

To prevent lowering of job performance and to correct performance difficulties by providing assistance to the employee at the earliest possible time.

- To investigate and follow up on problems that adversely affect the employee's job performance, while increased productivity, safety and health is sought through therapeutic intervention.

9.5. Furniture removal assistance for new employees

The employer will pay for the removal costs of furniture for new employees up to a maximum amount as approved by council, which may be reviewed from time to time. This will assist the new recruits in terms of relocating their furniture from their places to a place nearer to the workplace.

9.6. Accommodation of newly employed staff

All newly employed municipal officials will be accommodated by the municipality for a period not exceeding one month. The employer will incur all costs for accommodation if a room is rented and or an employee is booked in a hotel or lodge. Arrangement for such accommodation will be done by the employer.

9.7. Benchmarking with other employers

Majority of employees leave due to attraction by competitive remuneration in other organizations, better career growth opportunities and better incentives that are offered by other employers. The municipality will benchmark with other employers to find out the gaps that exist and what other incentives are offered as compared to the current status. This will allow for improvement on what the municipality can afford in order to decrease the turnover rate and also increase the recruitment rate of employees in critical skills.

9.8. Performance Management System

A performance management system policy and performance management system strategy is in place. The two documents will assist in guiding the assessment process of employees. The assessment committees will ensure that there is fair, consistent and transparent application of employee assessment. Processes for awarding of performance bonuses and on how to deal with poor performers and remedial measures will be dealt with in terms of the processes as provided in the Performance Management System policy.

9.9 Labour Relations

The Labour Relations Forum (Local Labour Forum) is in place and comprise of the employer and the two labour unions representatives. This forum is established in terms of the Labour Relations Act and Organizational Rights Agreement to deal with issues affecting workers in general at the workplace.
